

Tone Parameter

Notes

- [tn] means "Tone Number". Ymf825 has a maximum of 16 tones.
- [op] means "FM Operator". Ymf825 has 4 operators per voice.

BO

T_ADR	Name	D7	D6	D5	D4	D3	D2	D1	D0
#0+30x[tn]	BO	"0"	"0"	"0"	"0"	"0"	"0"	BO1	BO0

Description

BO means Basic Octave. BO controls an octave setting.

- BO=0 : 2^1
- BO=1 : 2^0
- BO=2 : 2^{-1}
- BO=3 : 2^{-2}

LFO, ALG

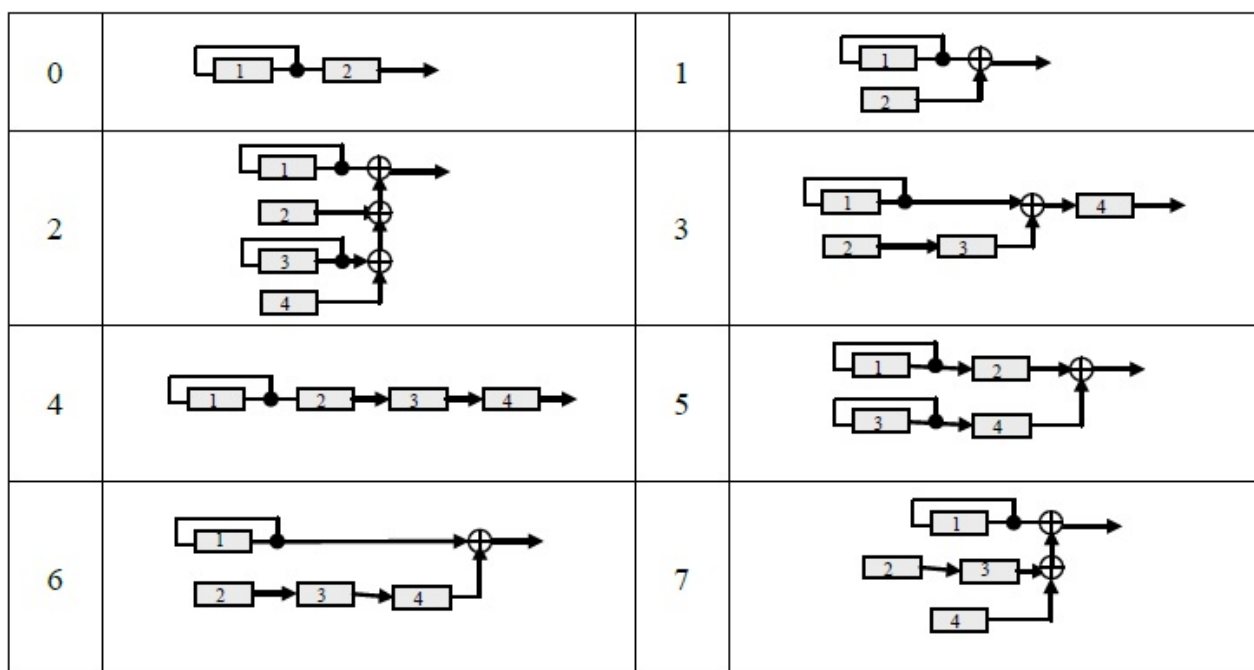

T_ADR	Name	D7	D6	D5	D4	D3	D2	D1	D0
#1+30x[tn]	LFO,ALG	LFO1	LFO0	"0"	"0"	"0"	ALG2	ALG1	ALG0

Description

LFO means a frequency of low frequency oscillator.

- LFO=0 : 1.8Hz
- LFO=1 : 4.0Hz
- LFO=2 : 5.9Hz
- LFO=3 : 7.0Hz

ALG means FM Algorithm. 8 algorithms can be selected.

SR, XOF, KSR

T_ADR **Name** **D7 D6 D5 D4 D3 D2 D1 D0**
 #2+30x[tn]+7x[op] SR, XOF, KSR SR3 SR2 SR1 SR0 XOF "0" "0" KSR

Description

SR controls sustain rate of each operator.

if SR is set to 0, sound level is retained.

XOF controls ignoring keyoff.

Evenif keyoff is set, any changes will not happen.

KSR means key scale sensitivity for AEG rate. if KSR bit is on, high F-num EG rate changes faster.

RR, DR

T_ADR **Name** **D7 D6 D5 D4 D3 D2 D1 D0**
 #3+30x[tn]+7x[op] RR,DR RR3 RR2 RR1 RR0 DR3 DR2 DR1 DR0

Description

RR controls release rate of each operator.

DR controls decay rate of each operator.

AR, SL

T_ADR **Name** **D7 D6 D5 D4 D3 D2 D1 D0**
 #4+30x[tn]+7x[op] AR,SL AR3 AR2 AR1 AR0 SL3 SL2 SL1 SL0

Description

AR controls attack rate of each operator.

SL controls sustain level of each operator. Sustain Level is the level just after decay rate.

TL, KSL

T_ADR	Name	D7	D6	D5	D4	D3	D2	D1	D0
#5+30x[tn]+7x[op]	TL,KSL	TL5	TL4	TL3	TL2	TL1	TL0	KSL1	KSL0

Description

TL means total level.TL controls operator level.

KSL means key scaling level sensitivity.In natural instruments, the volume attenuates as the pitch increases.KSL simulates this phenomenon.

- KSL=0 : 0
- KSL=1 : 3dB/oct
- KSL=2 : 1.5dB/oct
- KSL=3 : 6.0dB/oct

DAM, EAM, DVB, EVB

T_ADR	Name	D7	D6	D5	D4	D3	D2	D1	D0
#6+30x[tn]+7x[op]	DAM,EAM,DVB,EVB	"0"	DAM1	DAM0	EAM	"0"	DVB1	DVB0	EVB

Description

EAM means enable amplitude modulation.EAM set amplitude modulation.

DAM means amplitude modulation depth.

- DAM=0 : 1.3dB
- DAM=1 : 2.8dB
- DAM=2 : 5.8dB
- DAM=3 : 11.8dB

EVB means enable vibrato.EVB set vibrato.

DVB means vibrato depth.

- DVB=0 : 3.4cent
- DVB=1 : 6.7cent
- DVB=2 : 13.5cent
- DVB=3 : 26.8cent

MULTI, DT

T_ADR	Name	D7	D6	D5	D4	D3	D2	D1	D0
#7+30x[tn]+7x[op]	MULTI, DT	MULTI3	MULTI2	MULTI1	MULTI0	"0"	DT2	DT1	DT0

Description

MULTI controls magnification of frequency.

MULTI	0	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
magnification	1/2	1	2	3	4	5	6	7	8	9	10	12	15			

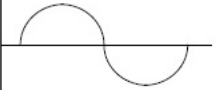

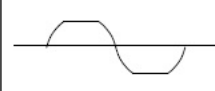

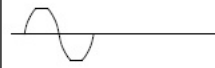

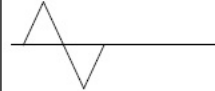

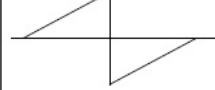

DT means detune.

WS, FB

T_ADR Name D7 D6 D5 D4 D3 D2 D1 D0
 #8+30x[tn]+7x[op] WS,FB WS4 WS3 WS2 WS1 WS0 FB2 FB1 FB0

Description

WS means wave shape each operator generates.
 29 wave shapes can be selected.

0		1		2		3	
4		5		6		7	
8		9		10		11	
12		13		14		15	
16		17		18		19	
20		21		22		23	
24		25		26		27	
28		29		30		31	

FB means FM feedback level.

- FB=0 : 0
- FB=1 : $\pi/16$
- FB=2 : $\pi/8$
- FB=3 : $\pi/4$
- FB=4 : $\pi/2$
- FB=5 : π

- $FB=6 : 2\pi$
- $FB=7 : 4\pi$
